During the interview, Examiners and Applicant's representative discussed claim 7 with the structural limitation such as the curved portion are formed at four corners of a peripheral portion of the die and a radius of curvature of the curved portion is 0.5 to 1.5 nm over the prior arts.

Applicant's representative argued that the prior art, Inoue does not disclose the die body, but it teaches related to the body of the product. Therefore, it would not have been obvious to combine with the prior art Yamamoto. This is found persuasive.

Examiners further discussed claim 12 having structural limitation such as a thickness of the die is 16 to 30 nm. Specification of the instant application does not support this limitation. No agreement was reaches at this point.
